

Handout 2: Employee Onboarding Automation System

Business Scenario

When a new employee joins the organization, HR must initiate the onboarding process.

The system should:

- Capture employee details
 - Obtain manager approval
 - Notify relevant departments
 - Send welcome email to employee
 - Track onboarding status
-

Business Process

```
graph TD; HR --> Submit[Submit Onboarding Request]; Submit --> Approval[Manager Approval]; Approval --> Notifications[Department Notifications]; Notifications --> Email[Welcome Email]; Email --> Complete[Onboarding Complete];
```
