

Handout 6: Leave Request Management System

Business Scenario

Employees submit leave requests through a Power App.

The system should:

- Capture leave details
 - Route request to manager
 - Process approval or rejection
 - Notify employee
 - Maintain leave request status
-

Process Flow

```
graph TD; Employee --> Power_App[Power App]; Power_App --> Power_Automate[Power Automate]; Power_Automate --> Manager_Approval[Manager Approval]; Manager_Approval --> Approval_Rejection[Approval / Rejection]; Approval_Rejection --> Employee_Notification[Employee Notification];
```
