

Handout 8: Visitor Management System

Business Scenario

Employees frequently invite visitors, customers, vendors, auditors, and interview candidates to the office.

The organization requires a system to:

- Register visitors
 - Notify security
 - Notify host employee
 - Generate visitor pass request
 - Track visitor information
-

Process Flow

```
graph TD; Employee --> Power_App[Power App]; Power_App --> Power_Automate[Power Automate]; Power_Automate --> Security_Notification[Security Notification]; Security_Notification --> Host_Notification[Host Notification]; Host_Notification --> Visitor_Registration_Complete[Visitor Registration Complete];
```
